The client asked for a memorial honoring his son that was a gifted musician and loved his fender stratocaster. They also wanted a sweet gum tree like the one they have at home. He sent a picture of his son's guitar and the two pieces were cut so the void in the middle is the shape of his guitar. The void symbolizing his guitar that he won't play again. A sweet gum tree was hand etched with a lone leaf falling showing that we are all going but he left a little early.
