

LPA 110

Type/Color of Stone: India Black

Overall Height and Width: 8' x 8'

The Lunar Planetary Institute (LPI) was once known as USRA, but with the changing of times came a change in names. And with their new name they wanted a new sign to reflect their campus revitalization. They contacted us for a bold new sign; with the gleaming black granite and crisp white lettering framed by red brick, it is now visible from the road and draws the eye. The shape suggests a planet in orbit.
